

# Become a member

## Benefits of becoming a member

- Find suitable **components and subsystems** that meet your needs
- Find reliable suppliers that offer **customized solutions**
- Find partners for **joint development or business collaboration**
- Find partners for **proof-of-concept collaborations**
- **Stay informed with the latest on Taiwan's supply chain**
- **Access to the most trusted one-stop matchmaking platform**

# 4SA

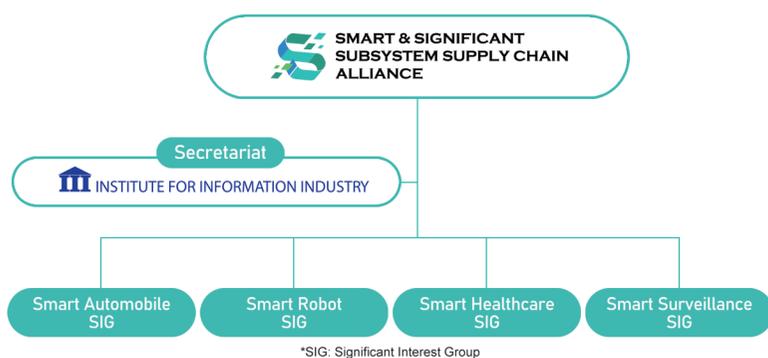

4sasources.com

Unlock the Future with 4SA:  
Leading the way in module and  
subsystem innovation  
for a smarter tomorrow.

# What is 4SA

4SA, the Smart & Significant Subsystem Supply Chain Alliance, connects Taiwan's manufacturers, system integrators, and industry associations across Smart Automobile, Smart Healthcare, Smart Robot, and Smart Surveillance, offering a premier one-stop platform while fostering collaboration between Taiwan's supply chain and global partners.

**Mission** Facilitate the development of subsystems within Taiwan's supply chain to foster greater collaboration with global partners and business.

# What we do

The Institute for Information Industry (III) manages the secretariat, ensuring smooth operations and supporting the alliance's activities.

Since its establishment in early 2024, 4SA has swiftly engaged with various industry associations and government departments, launching numerous events from the outset.

4SA aims to establish a comprehensive one-stop AI-matchmaking platform that aligns technological and market resources to meet the demands for building subsystems in smart automobile, smart healthcare, smart robotics, and smart surveillance.

By fostering collaboration among Taiwanese companies, 4SA will support the development of subsystems by providing subsidies for the creation of demonstration kits, selected from proof-of-concept (PoC) projects.

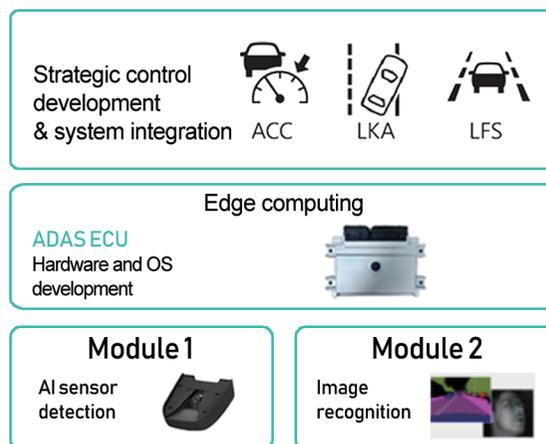

# What we provide

- Consulting**
  - Industrial trends and market demands research
  - Strategies and approaches for entering the global market
- Resource Integration**
  - Government & industry resources collaboration
  - Industry development & consulting with compliance
- Common Technical Standardization**
  - Software and hardware module standards for subsystem
  - Module interoperability testing and certification
- Proof-of-Concept Implementation**
  - Subsystem innovation and application lab
  - Large-scale event exhibitions
- Marketing**
  - Online international matchmaking platform
  - International exhibitions
  - Media promotion & marketing campaign
- Networking and Collaboration**
  - Joint visits to International organizations and businesses
  - Domestic and international networking and matchmaking
  - Industry exchange and sharing

# Subsystem

4SA encourages Taiwanese companies to collaborate in the creation of competitive subsystem by leveraging each other's research and development resources.

A subsystem is a combination of several hardware and software modules. An example of a subsystem in the Smart Automobile sector is as follows:

# Events

- 2024/04/12 → 4SA Subsystem Proof-of-Concept Solicitation
- 2024/04/17-20 → 2024 Taiwan-India Smart Vehicle Electronic Components Manufacturers Matchmaking
- 2024/07/12 → Autonomous Vehicle Application Trends Seminar
- 2024/08/01 → AI-Driven Software and Hardware Integration Workshop
- 2024/08/14 → Entering the Smart Automotive Electronics Global Supply Chain Workshop
- 2024/09/13 → International Trends in Autonomous Vehicle Forum
- 2024/09/20 → Smart Security Product Development Standards Compliance Forum
- 2024/09/24 → Autonomous vehicles Workshop
- 2024/09/11-13 → TAIWAN INDIA ELECTRONICS MEET 2024 in New Deli, India
- 2024/10/08 → 2024 Cross-Industry New Business Opportunities in EV Supply Chain Symposium and workshop
- 2024/10/15-17 → Move360 Europe in Munich, Germany
- 2024/10/30 → 4SA kick-off Meeting and Smart Subsystems Global Supply Chain Alliance Forum
- 2024/11/27-29 → 2024 4SA Round Table Meetings in four segments
- 2025/01/22-24 → Automotive World 2025 in Tokyo, Japan
